PROJECTS

A project on “QUIZ APPLICATION”

offline quiz application system is a java-based quiz system for accessing students. It is a system by which students can sit in a quiz which does not need pencil and paper. Nowadays, student take quiz manually. Lecturers need spend more time on grading/ correction. Other than that, the quiz paper may be will be missing. Students need to wait for lecturer’s finish grading to get their result. Therefore, this system will help lectures save their time because of automated marking. Lecturers can set up a quiz which is it will auto grade itself. Student can answer the quiz system us using rule-based algorithm used in this system is short answer based on keyword.

COURSES

- Completed a comprehensive course in advanced programming concepts.
