-

PROJECTS

A project on “E-LERNING PLATFORM”

E-Learning platform is a web-based application designed to make education accessible anytime, anywhere. Built using HTML, CSS, JavaScript, and PHP, it provides a seamless experience for both teachers and students. Teachers can easily upload and manage courses, while students can browse, access, and learn from these courses at their own pace. The platform focuses on user-friendly navigation, interactive design, and efficient course management, making online learning simple and effective. courses.

COURSES

- Completed a comprehensive course in advanced programming concepts.
 - Gained expertise in c, python and java.
 - Developed skills in data structures, algorithms, and software design.
 - Enhanced problem-solving abilities and coding efficiency.
-

ADDITIONAL SKILLS & INTERESTS

Adapting to challenging situations & achieving positive results.

Ability to grasp and learn new technology quickly & accurately.
